What can P3 do for you?

The Dejavoo P3 Handheld/PIN Pad offers many of the same features as the P5, but also includes a printer and dedicated keyboard. Equipped with Bluetooth, WIFI, and 4G, this handheld wireless Android device takes contactless, chip, and pin transactions to the next level.

The beautiful interface includes a quick scroll wheel so you can simplify the process of completing basic tasks such as transaction voiding, refunds, pre-authorizations, and more. This device can also be used as an iPOSPays gateway terminal.

Fit Your Brand

Add your logo and branding to terminal transaction screens

Super Fast Transactions

4G and WiFi for fast transactions

Intuitive Design

Snappy interface and easy-to-use navigation.

iPOSPays Gateway

iPOSpays

Payment Gateway Services

iPOSpays unites all your payment methods under one roof: terminals, Android phones, and online payment forms. And it's all stored in the cloud, so everything you can do from one terminal you can now do from anywhere.

Manage payments in the cloud

- Virtual terminal
- Hosted payment page for e-commerce
- SMS/Email payment requests
- Recurring payments

Your payments your way

- Multi-channel gateway accepts payments through terminals, phones, and online
- E-commerce ready
- Prepare and send invoices
- QR codes for pre-sale tickets
- SMS and email receipts
- Alternative payment methods including mobile wallet and cryptocurrency

Tools to take your business to the next level

- Merchant loyalty programs
- Cash discounting solutions to minimize processing fees
- Tip adjustment even after a batch is closed
- Manage your business on the go
